Symmetry Solutions Adds 3D Printing to its Technology Offerings

2008-06-02 22:49:16 - Minneapolis reseller adds even more value to its growing customer base

Minneapolis, MN - June 2, 2008 - Symmetry Solutions, a local value-added reseller (VAR) of SolidWorks® technology solutions, today announced it has become an official vendor of Z Corporation® 3D printers and scanners.

Z Corporation is a leading manufacturer of 3D high-definition printing and scanning hardware, which produce full color physical prototypes from digital data. Symmetry Solutions believes 3D printing technology is a new essential for clients seeking the best in design capabilities at an affordable price.

'We picked up Z Corporation products to better serve our customers' [design engineering](#) needs,' explains Symmetry Solutions vice president of sales, Paul Rudin. 'These rapid prototyping tools are easy-to-use and relatively inexpensive. And you can make a physical prototype out of a SolidWorks [3D model](#) very quickly, to easily test or validate design form, fit or function.'

Rudin cites several reasons for choosing Z Corporation's technology over other brands on the market: 1) it is the only 3D printing technology with full color capabilities; 2) the material used contains no hazardous materials, making them more appropriate for use in office or studio environments; and 3) the relatively inexpensive price point.

'With their focus on and expertise with the entire product development process, we are extremely excited to have Symmetry Solutions on board as a VAR,' says Andy DeHart, vice president of sales from Z Corporation. 'They bring a turn key solution that delivers a fast ROI and the highest level of value to Z Corporation customers.'

Symmetry Solutions has also signed on as a reseller of GeoMagic 3D software, which is sold as a companion to Z Corporation 3D scanning technology. Rudin reports that Symmetry Solutions intends to incorporate these new products into the technical support and training programs for its Midwestern customer base.

About Symmetry Solutions

Symmetry Solutions is a premier provider of SolidWorks® and Z Corporation 3D Printers to the upper Midwest region. Formed in 1998, Symmetry Solutions has served hundreds of companies, large and small, throughout the region, providing the expert insight and solutions needed for successful design, engineering, and production in a manufacturing environment. Symmetry Solutions is based in Brooklyn Center, MN. For more information, please visit: www.symsolutions.com.

About Z Corporation

Z Corporation makes products that enable users to capture, edit, and print 3D data with unprecedented speed, ease, versatility and affordability. These products include the world's fastest high-definition 3D printers - machines that product physical 3D models from digital data in full color - and uniquely portable 3D scanners - handheld machines that digitize 3D surfaces in real time. Z Corp. [technology](#) is enabling a wide range of applications in manufacturing, architecture, civil engineering, reverse engineering, geographic information systems (GIS), medicine and entertainment.
